Robotic Welding

- Welds that are more consistent and of higher quality
- Increased Productivity, Yields, and Throughput.
- Reduced waste and overall less rework.
- Post-weld cleanup has been drastically reduced.

Heli Arc Welding

- All positions capability
- Long welds can be made without starts and stops.
- Minimal post weld cleaning is required.
- Higher deposition rates than SMAW.

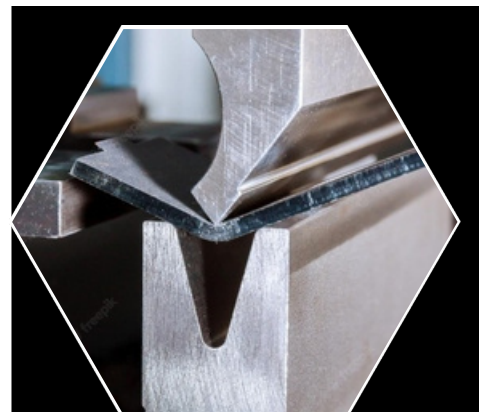

Laser Cutting

- Reliable and fast machinery for rapid turnaround
- Cuts through the thickest of metals – including mild steel
- Cut complex shapes with precise detail
- Non-wearing for a flawless edge finish

CNC Bending & Punching

- High labour productivity is due to the possibility of simultaneous execution of various operations for cutting and bending metal work pieces.
- CNC bending machines ensured more accurate measurements and designs.

Powder coating

- Sophisticated 9 tank pre-treated chemical process.
- Anti-bacterial powder coating
- Powder coatings are also comparatively durable, cost-effective, and environmentally-friendly.
